Yadkin – Fentress 500 kV Electric Transmission Project

At Dominion Energy, we are committed to providing safe, reliable, and secure energy to the communities we serve. As previously announced, we are planning to rebuild 14 miles of existing 500 kilovolt (kV) transmission lines that run between our Yadkin and Fentress substations in the City of Chesapeake, Virginia.

We will submit the project to the Virginia State Corporation Commission (SCC) in summer of 2024. To learn more about the Yadkin-Fentress 500 kV Electric Transmission Project, you are invited to our Community Meeting on Tuesday, April 9, 2024. During the meeting you can speak to project team members and ask them

detailed questions about the project. There will not be a formal presentation, so please feel free to stop by at your leisure between 5:00 p.m. and 7:00 p.m.

Also, we welcome you to explore our interactive structure comparison tool. Please follow the QR Code to view. This tool allows you to:

- Use the address search to see structure locations in your area.
- View details about individual structures by clicking on a structure location marker to see the name, existing and proposed heights, structure types, and locations.
- View simulations of existing and proposed structures, including height and color options.
